

How to connect to Peppol?

Option 1:

Check if your financial software provider offers an integrated Peppol solution

Your software does not support Peppol registrations and document exchange?

Choose a Peppol Access Point

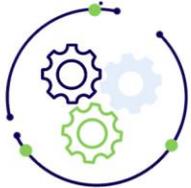

Option 2:

Choose a Peppol Access Point from the official [certified access point list](#).

What you need:

A functional **ERP system** or accounting software service

External Integrator or in-house developers with RESTful JSON experience

Time available for implementation (1-6 weeks)

More than 12K invoices per year?
What we advise:

Option 3: Choose Storecove as your Peppol Access Point

Steps for your developer:

How to get started?

API
documentation

Request a test
account

Sandbox test
environment

Send and receive
compliant e-invoices

API Support:
apisupport@storecove.com

- 1 Request a sandbox [testing account](#).
- 2 Create your own API key and start testing in the sandbox developer mode.
- 3 Your production account will be activated as soon as the signed contract is returned.
- 4 You can now start sending and receiving e-invoices.
