ERP INTEGRATION
PROCESS

storecove

A functional **ERP system** or accounting software service

External Integrator or in-house developers with RESTful JSON experience

Time available for implementation (1 - 6 weeks)

How to get started?

API documentation

Sandbox test environment

API Support

Create a test account

Signed contract

Steps

1. **Register** as an e-invoicing service provider.

2. Create your own API key and can start testing in sandbox developer mode.

3. Your production account is activated as soon as the signed contract is received.

4. You can now start sending and receiving e-invoices (or enable e-invoicing features for customers)
