# ERP INTEGRATION
## PROCESS

**What do you need to connect to the e-invoicing API?**

storecove

**A functional ERP system or accounting software service**

**External Integrator or in-house developers with RESTful JSON experience**

**Time available for implementation (1 - 6 weeks)**

## How to get started?

**API documentation**

**Sandbox test environment**

**API Support: apisupport@storecove.com**

**Create a Storecove test account**

**Open Peppol test environment**

## Steps

1. **Register** as a service provider.

2. Create your own API key and can start testing in sandbox developer mode.

3. Your production account is activated as soon as the signed contract is received.

4. You can now start sending and receiving e-invoices.
